ABOUT THE CHAMBER

Three Divisions, Promoting Better Business

ECONOMIC DEVELOPMENT

and provide expansion opportunities. Under the direction of the St. Joseph Economic Development Council, the Economic Development Division is funded through a community partnership for economic development -- the Partnership for Success campaign. It is supported with funds raised from both public and private sectors. The Partnership for Success includes the City of St. Joseph, Buchanan County, and more than 150 local businesses.

The Chamber recognizes what an important aspect community development plays in creating a community where people want to live and work and businesses wish to invest. As such, the Economic Development Division takes an active part in facilitating this mission and to improve physical infrastructure and amenities, other keys to growth. The Chamber also actively recruits for new residents to move to St. Joseph to become a member of our workforce through **talent recruitment initiatives**.

This division also works with the St. Joseph Workforce Development Alliance. This group recognizes what an integral component the workforce plays in the economic growth of a community. It seeks to support, enhance and implement initiatives focusing on the improvement of the area labor force. It is comprised of the Chamber, the St. Joseph School District,

The Economic Development Division is responsible for recruiting new businesses to the community and assisting existing businesses in an effort to retain jobs

Hillyard Technical Center, Missouri Western State University, the United Way of Greater St. Joseph, North Central Missouri College, Metropolitan Community College and local businesses. The purpose is to coordinate local training and educational initiatives to support a prepared and engaged workforce, leading to successful local businesses.

Government Relations

The Chamber works to foster relations with the various levels of government, and to represent the business community in addressing legislative issues. Government policies directly affect business, so the Chamber speaks out on behalf of the business community. The Chamber monitors a wide variety of issues and focuses on a number of key areas. The Chamber's advocacy ranges from formal testimony to informal discussions with key elected officials.

MEMBERSHIP

The Membership Division works to strengthen the membership of the Chamber through effective retention and recruitment efforts. It also provides communication, marketing, networking and educational opportunities for members, and increases the visibility of the Chamber within the community.

ADMINISTRATION

The Administration Division provides coordination and direction of all organizational resources, financial services and building management.

Communications

The Communications Department is responsible for the management and dissemination of Chamber programs, activities and initiatives to members, potential members, the business community, and the general public, through various publications and marketing efforts.
